

# Los Lagos II Homeowners

ASSOCIATION NO.1  
1700 Montana Vista  
Lake Havasu City, AZ 86403-9399  
<http://loslagosvistas.com>

In response to incidents regarding the cable cutting and/or unhooking cables of some of the condos (costing owners hundreds of dollars), **owners are encouraged to require TV satellite and cable providers to complete this form when they provide service to the homeowner.**

Name and address of unit owner	
Name of company and technician performing service	
Date and time technician performed service	
Description of work Provided	

Please Note: The technician is to work on the one cable of the unit for which he/she is hired. They are not to disconnect, disable, or cut any other cables on the roof. They are not to use or disable the TV antenna to each building in any manner. They are there, for the sole purpose of installing a satellite dish in accordance with the existing dish installation instructions listed on the web page.

Please provide a copy of this completed form to the other three residents in your building. Our goal is for all homeowners in each building to have a current record of all Dish, Direct, Suddenlink, and other cable providers work completed.

Owners will then be better able to identify the company name and the technician, if any cables are cut to other units, if a technician disables the antenna service, or if there are other acts which the association considers vandalism.

January 2015,

Board of Directors
